

## ASP

Last week the children from the Provision worked together to create a circular woven rug from recycled materials. They created a frame using a broken hula hoop and strips of fabric from the scrap project. The children then chose the fabrics they liked and took turns to weave in and out of the mesh, building up the design from the centre. We talked about the texture and pattern of the fabric and described what our actions using the vocabulary 'over' 'under' 'push' and 'pull'. Weaving was a new skill for most of the children and they found it tricky at first but by end of the session everyone was able to do it really well!
